Dear Mr. Lutz,

the basis for issuing EU type examination certificates is the Directive 2014/34 EU. In "Chapter 1, General Provisions, Article 1" the scope of application is described. Accordingly, common cable transit devices are not covered by this directive. Only if the devices are used as cable entries for equipment to be operated in explosion-proof areas, this directive would be applicable.

I hope to be able to help you with this statement.

Yours faithfully
On behalf of PTB:

Dipl.-Ing. J. Flötotto
