# **Annular seal**

**Compact seal insert**

**Two-component construction, stainless steel version**

**Tight against pressing water**

## ***Pipe-Seal Senso***

**Compact seal insert in a two-component construction for sealing pipe penetrations against pressing water**

Annular seal against pressing water, consisting of an elastomer ring in a two-component construction, a carrier core component made of medium-hard solid rubber, a closed covering element made of soft thermoset elastomer, pressure flange plates and stainless steel connecting elements to be delivered and installed into the annulus between wall sleeve/core-drilled hole and the carrier pipe supposed to be led through according to the manufacturer's installation instructions.

Product:

DDL Pipe-Seal Senso  
DDL GmbH, 73249 Wernau a.N.  
or equivalent

Outside diameter of the carrier pipe (including potential factory coating):

DN .....

OD ..... mm

Inside diameter of the wall sleeve or core-drilled hole:

ID ..... mm

Material

- Sealing ring: EPDM Shore A 50 and thermoset elastomer Shore A 20
- Steel frame: Stainless steel V2A/AISI 304
- Screws: Stainless steel V2A/AISI 304

Amount of seal inserts:

Pcs. ....

Unit price: .....€

Total price: .....€
